DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,4,7,8,10,12-24 58-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leonhardt et al. This reference discloses in the abstract and col. 7, lines 30-55 a method of making a magnetic device comprising applying a servo track on to the backing ^{of} a magnetic tape on the side opposite the magnetic layer by laser marking the backing with the servo pattern. It is the examiner's opinion that applicants' method is at the very least an obvious variation of the reference process. Also the limitations of the dependent claims are conventional and do not render these claims unobvious.
